SUMMARY

Very ambitious and hard-working student who offers a new point of view and a strong work ethic. My objective is to evolve, perfect my current skills and learn new things.

COMPUTER SKILLS

Languages

- Proficient in: C++, Java, Python, SQL, HTML, Lisp
- Familiar with: C#, CSS, JavaScript

Software

- Visual Studio, Eclipse, IntelliJ, PyCharm, Qt, Unity, Mendix

EXPERIENCE

Research Assistant at Accenture - Internship   APR - OCT 2021

Covid-19 Risk Prediction

- Project in collaboration with Clujana Hospital in Cluj-Napoca.
- The main objective of this project was to use intelligent algorithms to predict and analyze the future risk of Covid patients.

Personal Project   2021

Rage Run

- Created a small 3D game using Unity.
- "Rage Run" is a very hard runner where you play as a simple cube.

Web Programmer and Business Analyst   2019

Connect School

- Competition "EduHack", based on education challenges.
- Contributed to this project by working on the business plan and writing code for the web site.

Volunteer   2019 - PRESENT

Student Organization

- Coordinated activities for a debate competition and for the annual celebration of the organization.

EDUCATION

Faculty of Mathematics and Computer Science   OCT 2019 - JUN 2022

Cluj-Napoca

- Bachelor's degree in the department of Mathematics and Computer Science taught in English
- Finished the first year in the top 5 in my department, winning a scholarship

ADDITIONAL ACTIVITIES

From childhood I had a passion about art and design. Throughout the years I refined these skills by creating artworks and illustrations for the student organization at my university, and recently I discovered my love for front-end programming.
